Education

New Brunswick Community College (NBCC) **Graduated: June 2026**

Diploma of Information Technology: Software Development (Honours) *Fredericton, NB*

- Courses: Software Engineering, OOP, Server-Side Web, JavaScript, Database Design & SQL, Embedded Systems, Networking, Responsive Web Design, Operating System

Work Experience

New Brunswick Plants **June 2026 – September 2026**

Junior Full-stack developer (Volunteer) *Fredericton, NB*

- Progressed from a structured practicum into an independent contributor, owning feature development on a **PHP (Apache)** and **Node.js/TypeScript** web application while collaborating with the development team via **Git/GitHub** code reviews and sprint planning sessions to align on architecture and priorities.

New Brunswick Plants **April 2026 – June 2026**

Junior Full-stack developer (Practicum) *Fredericton, NB*

- Migrated **WordPress backend** from Elementor page builder to custom **ACF page models**, decoupling content management from presentation by exposing structured content through **REST API** endpoints consumed by a **Next.js frontend**, preserving editor workflows while giving developers full control over styling and layout
- Built **3 SEO utilities from scratch** (sitemap, JSON-LD schema, and Open Graph generators) and resolved **mobile responsiveness and server-side rendering** issues across a **WordPress + ACF + Next.js** stack

East Side Mario's **Sep 2024 – Present**

Supervisor / Bartender / Server *Fredericton, NB*

- **Trained and supervised staff** on front-office and bar closing procedures, overseeing task completion to maintain service quality

Projects

Stotify - Self-Hosted Music Streaming App | *Source Code* **React Native | TypeScript | Docker | Oracle Cloud**

- Built a **full-stack personal music streaming app** for Android, using **React Native (TypeScript)** with **Expo**
- Implemented a complete mobile music player, including **background audio, lock screen/notification controls**, a persistent mini player, a Now Playing screen, **custom seek bar**, **shuffle/repeat**, and **queue management**
- Integrated the **Subsonic API (Navidrome)** to stream music from a self-hosted server over HTTPS
- Deployed Navidrome on an **Oracle Cloud Free Tier Ubuntu VM** using **Docker Compose**, with **Caddy** as a reverse proxy and automatic TLS via Let's Encrypt + DuckDNS
- Built and side loaded the APK onto an Android device using **EAS Build** (Expo Application Services)

Alarm Control Node | *Source Code* **C++ | Embedded Systems**

- Designed an **ESP32-based alarm system**, using a **Finite State Machine (FSM)** to manage system states and alarm logic in a modular C++ architecture built with PlatformIO
- Integrated **sensors and actuators** (PIR Motion sensor, button, buzzer, LED, I2C LCD)
- Added **Wi-Fi and Discord webhook notifications**

Game Store | *Source Code* **C# | .NET | Blazor**

- Built a **full-stack CRUD** app with a **C# .NET REST API** backend and **Blazor** frontend, applying **MVC** design patterns for clean separation of concerns and a responsive **UI**

Technical Skills & Other Qualifications

Programming Languages: C#, SQL, JavaScript, TypeScript, Java, C++, Python, PHP

Frontend: React, React Native, Next.js, Expo, Blazor, Material UI, TailwindCSS, Bootstrap, jQuery

Backend & APIs: .NET, Spring Boot, Node.js, Express.js, REST API, JSON-LD, OpenGraph, Subsonic API

Databases: MySQL, MSSQL, Oracle SQL

DevOps & Tools: Docker, Docker Compose, Caddy, Git, GitHub, Oracle Cloud, AWS, EAS Build, Trello, Jira

CMS: WordPress, Advanced Custom Fields (ACF)

Languages Spoken: Fluent in English and Portuguese, Intermediate Spanish, Beginner French
