Education

New Brunswick Community College (NBCC) **Graduated: June 2026**

Diploma of Information Technology: Software Development *Fredericton, NB*

- Courses: Software Engineering, OOP, Server-Side Web, JavaScript, Database Design & SQL, Embedded Systems, Networking, Responsive Web Design, Operating System

Work Experience

New Brunswick Plants **April 2026 – Present**

Junior Full-stack developer (Practicum, then Volunteer Contributor) *Fredericton, NB*

- Retained as a volunteer contributor after a 7-week practicum based on team feedback, continuing to ship features on the production Next.js application
- Built **3 SEO utilities from scratch** - sitemap generator, JSON-LD schema generator, and Open Graph generator - integrated directly into a live production Next.js application
- Refactored **UI components using Material UI** and designed a unified application theme, improving visual consistency across the app
- Resolved **mobile responsiveness and server-side rendering** issues across a WordPress + ACF + Next.js stack, restoring feature development
- Wrote **internal documentation** for Material UI component usage and WordPress page usage to improve onboarding and team consistency, and participated in **code reviews on GitHub**

East Side Mario's **Sep 2024 – Present**

Supervisor / Bartender / Server *Fredericton, NB*

- **Trained and supervised staff** on front-office and bar closing procedures, overseeing task completion to maintain service quality

Projects

Stotify - Self-Hosted Music Streaming App **React Native | TypeScript | Expo | Docker | Oracle Cloud**

- **Built a full-stack personal music streaming app** for Android, using React Native (TypeScript) with Expo
- Implemented a complete mobile music player: **background audio, lock screen & notification controls**, persistent mini player, Now Playing screen, custom seek bar, shuffle/repeat, and queue management
- Integrated the **Subsonic API (Navidrome)** to stream music from a self-hosted server over HTTPS
- Deployed Navidrome on an **Oracle Cloud Free Tier Ubuntu VM** using Docker Compose, with Caddy as a reverse proxy and automatic TLS via Let's Encrypt + DuckDNS
- Built and sideloaded the APK onto an Android device using **EAS Build** (Expo Application Services)

Alarm Control Node | *Source Code* **C++ | Embedded Systems**

- Designed an **ESP32-based alarm system**, using a **Finite State Machine (FSM)** to manage system states and alarm logic in a modular C++ architecture built with PlatformIO
- Integrated **sensors and actuators** (PIR Motion sensor, button, buzzer, LED, I2C LCD)
- Added **Wi-Fi and Discord webhook notifications**

Game Store | *Source Code* **C# | .NET | Blazor**

- Developed a **full-stack CRUD** web application using **C# .NET REST API** backend and a **Blazor** frontend with a responsive, user-friendly UI
- Implemented clean separation of concerns between API layer and frontend, following .NET MVC patterns

Technical Skills & Other Qualifications

Programming Languages: C#, SQL, JavaScript, TypeScript, Java, C++, Python, PHP

Frontend: React, React Native, Next.js, Expo, Blazor, Material UI, TailwindCSS, Bootstrap, jQuery

Backend & APIs: .NET, Spring Boot, Node.js, Express.js, REST API, JSON-LD, OpenGraph, Subsonic API

Databases: MySQL, MSSQL, Oracle SQL

DevOps & Tools: Docker, Docker Compose, Caddy, Git, GitHub, Oracle Cloud, AWS, EAS Build, Trello, Jira

CMS: WordPress, Advanced Custom Fields (ACF)

Languages Spoken: Fluent in English and Portuguese, Intermediate Spanish, Beginner French
